Dear Wenyan Cui:

Congratulations! On behalf of the Boston University College of Engineering, I am delighted to offer you admission to the Master of Science degree program in Electrical & Computer Engineering beginning Fall 2023. As one of the top engineering graduate schools in the nation, we are excited to have you join us for your graduate career.

Our Master's program has a rich legacy of serving students wishing to develop deep technical qualifications beyond the bachelor's degree suitable for advanced positions and careers in industry or for continued study towards a doctoral degree. Students in the Master of Science program complete coursework and a practicum. The practicum can be satisfied either via a design project associated with a restricted set of courses or a formal thesis which typically takes a year or more and requires that students secure a faculty thesis advisor. For more information, please find your degree program requirements on our website at www.bu.edu/eng.

Your offer of admission is evidence of our confidence in your potential and recognition of your academic and personal achievements. Applications for tuition scholarship far exceed the number of awards available. Unfortunately, we are unable to offer you a tuition scholarship award. However, there are several other sources of financial assistance that may be available to you. These may include on-campus employment opportunities, external fellowships, and the Tuition Payment Plan. For more information about these and other sources of financing, please refer to <https://www.bu.edu/eng/admissions/graduate/financing-your-education/>.

Please consider this offer of admission carefully. Boston is a hub of industry and scholarly activity offering a unique blend of cultural, social, and educational opportunities unequalled in American higher education. We invite and sustain a vibrant national and international student population, and believe that a deep appreciation of global and cultural awareness and respect is a critical component of an engineering education. I can assure you with confidence that joining our BU community will further advance your personal and professional goals.

A deposit of \$500 is required to secure your place in the program. You can notify us of your decision and pay your deposit using the Applicant Gateway portal, which can be accessed using the link at the bottom of this letter. You will also be receiving a system generated email that includes the link to directly access the Applicant Gateway.

In order to fully matriculate at Boston University, we require your acceptance of our offer of admission, including payment of your deposit, as well as the requested international student documentation for your I-20. Please see our website: <https://www.bu.edu/eng/admissions/graduate/graduate-admissions/international-students/> for details on required documents. As some students have experienced extended processing time for visas, we encourage you to respond to this offer as soon as possible to prevent delays in processing your I-20, but no later than **April 15, 2023**.

I congratulate you on your personal and professional success to date and on your admission. We hope you choose to continue your education at the Boston University College of Engineering.

Sincerely,

Solomon R. Eisenberg, SgD
Professor of Biomedical Engineering
Senior Associate Dean for Academic Programs
Boston University College of Engineering
